ECO TENT

Luxury Under The Stars

Copelands & Pickers Pty Ltd and more recently Eco Tents Australia Pty Ltd have developed the Eco Tent to satisfy the growing appetite of camping but with a few of life's luxuries thrown in, with what is being referred to more and more as Glamping. Copelands & Pickers design and manufacture a standard range of Eco Tents which are available in kit form for your handyman or tradesman to install on site. A cost-effective environmentally-friendly outdoor accommodation option, blending in with the natural environment and designed to provide campers a luxury form of camping.

Decking is made in USA by world's #1 decking brand – TREX, the inventor of timber alternative composite decking. It is incredibly easy to install, leaving no painting, staining, splintering, fading or rotting to worry about. It is also resistant to termites. TREX carries a 25 year limited residential warranty and 10 year limited commercial warranty.

- The main feature of our design is having three layers of coverage on the roof section with spacing between each layer to provide air flow
- Top layer is a Australian made commercial grade shade cloth which provides shade and reduces heat build up within the tent. Warranty – 15 years, pro rata
- The second layer is a solid fabric with a waterproof finish that provides protection. Warranty – 5 years
- The third layer is the tent roof, which is made from an Australian made quality 14.9oz 505gsm waterproof canvas. Warranty – 5 years
- The 3 combined layers offer insulation from the elements and positioned to allow air flow
- The tent walls are made from an Australian made quality 10.9oz 370gsm proofed canvas
- Windows and doorways have heavy duty insect screen mesh for protection. Warranty – 5 years
- The product is supplied in kit form, to be erected on site by a handyman or tradesman
- We will provide assembly details
- Foundations, footings and support posts are not provided as they are site specific.
- TREX decking is optional. Customers may decide to build there own decking from alternative materials.
- Council approval may be required. The rule for obtaining can vary from one council to another, as many of them have different regulations regarding decking assembly, minimum deck height above ground level, etc. It is recommended the customer check with their local Council.
